## 2. Work the Angles

For a powder room this Lilliputian, a mirror hung at an angle above a corner sink maximizes every inch (and clutter can be stashed behind the fabric skirt). The Wedgwood plates and round accent table help counteract the boxiness—and add charm!

## 3. Achieve a Lot with a Little

Even modest, done-in-a-day alterations can deliver major personality. Here, chicken wire installed in place of glass cabinet doors ups the country feel and shows off stacks of fresh towels.

## 4. Deploy Some Paint Tricks

Complete with trompe l'oeil tassels, summery blue and white stripes transform a powder room by a pool into a tented beach cabana. The stripes on the ceiling mimic a peaked roof and help fool the eye into seeing a taller, loftier space.
